

IMPLEMENTATION OF COMPREHENSIVE CYBERSECURITY SOLUTION FOR TBS LTD., LEADING TRADING COMPANY IN DEFENSE SECTOR

SECTOR:

Defense Industry

COMPANY PROFILE:

TBS Ltd. is an international trading company providing some of the world's most innovative and advanced technological solutions, securing Land, Air and Space.

THE CHALLENGE:

Following its rapid progress and modern tendencies in cybersecurity, TBS's management focuses on improving its overall security posture. Moreover, the industry in which operates requires utmost strict data protection due to its sensitivity. Those realities drove the company for the latest and best-in-industry solutions - "Zero Trust" being the one which encompasses all devices, network, and offering the most comprehensive security on the market.

DIAMATIX DEVELOPED THE FOLLOWING STREAMS FOR PROJECT COMPLETION:

- **Assessment Stage** - Assessment of current IT infrastructure state, creating high level design;
- **Project Management Stage** - Overseeing all aspects of the project: commercial, legal, technical, communications (internal and external);
- **Implementation Stage** - Integration of software & hardware security solutions;
- **Policies and Procedures Stage** - Develop policies and procedures according to best industry practices;
- **Managing & Operations** - Weekly reports, Trainings, Security Operations 24x7;

TECHNOLOGICAL SOLUTIONS:

- **Network Security**
 - Implementing Fortinet Security Fabric solutions for secure network infrastructure through Next-gen Firewalls, Switches;
 - Integration with Diamatix Security Operations Center (SOC) which provides monitoring, threat identifying and forensics, incident management and reporting 24x7;
- **Device & Data Protection**
 - Protecting flow of information through Email Security by Acronis & Perception Point
 - Ensuring users validity and security through Zero Trust Network Access framework;
- **Policies & Processes**
 - Diamatix developed policies, procedures, processes, which cover areas like access control, data management, incident management, change management, etc;

UTILIZED PRODUCTS AND SERVICES:

- Fortigate
- Fortiswitch
- FortiClient
- Acronis Advanced Email Security
- Diamatix Professional Services
- Diamatix SOC 24x7
- Diamatix Managed Services

BUSINESS IMPACT:

The customer gets a competitive advantage in terms of securing its partners data on a very high level. Moreover, it is ready to face contemporary challenges and protect sensitive information according to the highest standards and practices.

CUSTOMERS OPINION:

"DIAMATIX offered us a tailored approach, which fits our needs as a company in the defense industry. They managed to understand the complex matter of data sensitivity in the sector and proposed to us the best solution for network and information security."

Stefan Galabov, CEO of TBS Ltd.
